# WILLIAM WEIHNACHT

763 De Haro St., San Francisco, CA 94017 ◆ 415-730-3555 ◆ wwhynot@terpmail.umd.edu

## PROFESSIONAL SUMMARY

Professional Profile Aspiring computer scientist seeking to obtain a summer internship developing software under the mentor-ship of veterans. Open minded and tenacious, with strong collaborative ability.

## EDUCATION

**B.S**: Computer Science
**University of Maryland College Park**

## PROGRAMMING LANGUGES

Java, C, Ruby, Python, Javascript, MySQL, React, HTML5/CSS3, OCaml, Prologue, Objective-C, Assembly

## SKILLS

- Operating Unix/Linux command line systems
- Strong understanding of Git
- Deft debugging skills with Emacs/ Eclipse/IntelliJ
- Apt with Adobe Photoshop/After Effects
- Experience working on collaborative coding projects

## PERSONAL PROJECTS

**Trending Words** - 2019
Trending Words is a Reddit bot I made with Python that scrapes words from the daily top Reddit posts and finds which ones are most commonly used. I plan to take this a step further and implement image processing functionality via a neural network.

**Whrpl** - 2015
A social media site I collaborated that allows anonymous posting using a school email. I mainly worked on writing Python scripts to add functionality to buttons on the page, using Git to allow for version control and simultaneous work. In doing this I learned how to do valuable Git operations like merging and also learned HTML, CSS, and some MongoDB.

## WORK HISTORY

**Server**, 06/2018 to 09/2018
**Our Poke Place** – San Francisco, CA
I worked for a summer at a sushi restaurant. Doing so fostered people skills, accountability, and diligence on my behalf.

**IT/Tech Support**, 06/2016 to 07/2016
**Roxie Film Theater** – San Francisco, CA
Worked to make sure office equipment was functioning and made calls to other companies to schedule events.
